SCOPE OF WORK PROVISIONS

FOR

ELECTRICIAN:
INSIDE WIREMAN, TECHNICIAN
CABLESPLICER

IN

SANTA CLARA COUNTY

RECEIVED

Department of Industrial Relations

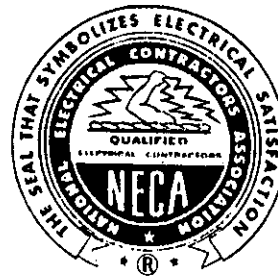

OCT 11 2000

Div. of Labor Statistics & Research
Chief's Office

AGREEMENT

Between

Local Union No. 332
International Brotherhood of Electrical Workers
San Jose, California

And

Santa Clara Valley Chapter
of National Electrical Contractors Association

Effective **JUNE 1, 2000**

1 only. Correction to be made only after a fair investigation by the Employer
2 and the Business Manager of the Union.

3
4 Section 3.19. (a) Workers employed under the terms of this Agreement
5 shall do all work of handling and moving any electrical material, equipment
6 and apparatus on the job to be installed by workers covered hereunder
7 which shall include all electrical construction, installation or erection work
8 and all electrical maintenance thereon, including the preliminary and final
9 running tests. This shall include the installation and maintenance of all
10 permanent and temporary lighting, heating and power equipment. No
11 electrical equipment installed under this section shall be energized while in
12 a definite hazardous condition after normal working hours unless under the
13 supervision of a qualified electrician. Prefabrication shall be done by
14 workers covered under the terms of this Agreement.

15
16 (b) Cable Splicing: All work of joining, splicing and
17 insulating, where wiped lead joints are necessary, shall be performed by
18 cable splicers. Journeyman wiremen shall be used in assisting cable splicers
19 in all manhole work and where wiped lead joints are necessary, and may
20 place flame proof covering.

21
22 The splicing or joining of synthetic cable of such insulation or application
23 characteristic which requires skill and experience not possessed by the
24 average journeyman wireman shall carry the cable splicer rate. The
25 necessity for an assistant to the cable splicer shall be determined by the job.

26
27 (c) Cable splicers shall not be required to work on wires
28 or cables when the difference in potentials is over three hundred (300) volts
29 between any two (2) conductors or between any conductor and ground,
30 unless assisted by a journeyman wireman. In no case shall cable splicers be
31 required to work on energized cables carrying in excess of four hundred and
32 forty (440) volts.

33
34 (d) If not supplied by the Employer, the cable splicer
35 shall receive four dollars (\$4.00) per day tool allowance, and be reimbursed
36 for the amount of gas used.

37
